

Software proven to make your business more efficient... and profitable

Introduction:

For years, only businesses fortunate enough to have large technology budgets were able to reap the benefits that came from Enterprise Content Management. Advantages like streamlined business processes, workflow automation and increased information access are just a few of the rewards these companies enjoyed. This efficiency led to more profitable organizations that weren't drowning in an endless sea of paper but it also came at a price that only a few could afford...

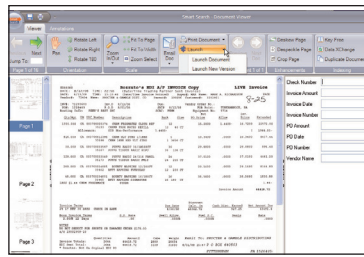

All that has changed thanks to Square 9 Softworks, the creators of SmartSearch, the first content management solution designed to be both powerful and cost effective.

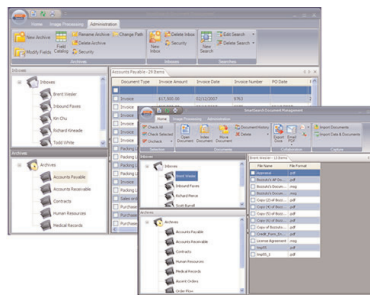

What is SmartSearch?

SmartSearch is a feature-rich Enterprise Content Management suite that organizations of all sizes use to manage their documents electronically, driving efficiency and productivity into their business processes. Designed as a centralized hub for document efficiency, SmartSearch is a scalable, value-driven solution that is easy to use, learn and support.

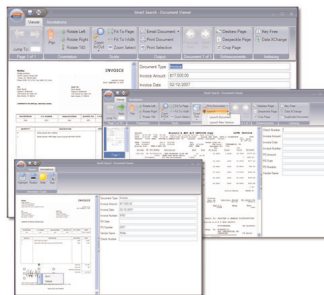

SmartSearch is used extensively by many paper-intensive businesses to bring greater efficiencies – school systems, law offices, construction companies, physician practices, accounting firms, trucking companies, and mortgage or title agencies – any business looking for a cost-effective way to streamline their paper-based business processes.

Launch Documents: SmartSearch supports the storage of any document type in its native format. Users can modify and collaborate with the document by selecting the Launch Document feature. To create and save a new version of a document, users can select launch New Version to index a completely separate document record.

SmartSearch supports two storage destinations, either an Inbox or Archive. Inbox locations are file system directories exposed as temporary storage locations for in-transit documents. Archives are secure, audited, data driven storage locations that allow for metadata to be associated with the document record and retrieved through pre-defined or browse searches.

The SmartSearch document viewer window allows users to interact with the document through image enhancement capabilities, OCR assisted data entry, data source look-ups, annotations, append or deletion of pages as well as basic rotation and navigation.

Get more for less with SmartSearch

What makes SmartSearch unique is that it offers the same functionality found in many other enterprise level Content Management solutions for a fraction of the cost. While designed for ease of use and rapid adoptability, SmartSearch is almost deceptively powerful. With features like .NET architecture, Active Directory integration, Audit Trail User Tracking, OCR and Database Assisted Indexing tools, SmartSearch is built for business.

FEATURE BENEFITS

Active Directory Integration

Audit Trail User Tracking

Bar Code Recognition

MFP and Twain Based Scanning

Microsoft Office Integration

Microsoft SQL Server 2005 Database

Native Document Support

.Net Architecture

OCR Assisted Indexing

XML Import Integration

"SmartSearch® met the challenge of lost orders. With SmartSearch, we can accurately measure sales order volume, track orders quickly and push out next day deliveries."

Chris Pike, Chief Operating Officer,
Durst Corporation.

"Now accessing records is so much easier with SmartSearch. We simply enter the matter number or client name into SmartSearch and the document is available immediately."

Beverly Casado, Office Manager,
Law Office of Brady, McGuire and Steinberg

"SmartSearch really works well with what we do."

Becky Thayer, Office Manager

Defining business efficiency

Square 9 Softworks is a leading developer of innovative, business-centric software solutions including the award-winning SmartSearch Content Management Suite. Dedicated to making content management available to organizations of all sizes, Square 9 Softworks designs solutions built on open architecture and cutting-edge technologies that drive efficiency and productivity across all business applications.

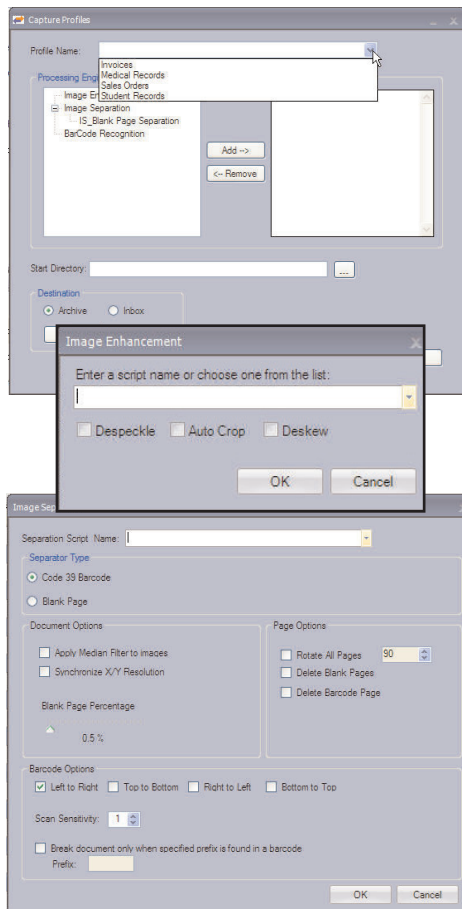

Through decades of experience with content management technologies in an array of business models, Square 9 Softworks

has acquired a thorough understanding of document-driven business processes. Intensely customer-focused and responsive, Square 9 Softworks delivers highly effective, value-driven solutions for driving organizational efficiency and has achieved a reputation for excellence in meeting the rapidly evolving needs of the business world.

Technical requirements

SmartSearch has been certified on Microsoft Vista, Server 2003 and 2008 as server platforms and the Windows and XP and Vista client. The Microsoft .NET 3.5 framework is required for the operation of SmartSearch, however it is automatically included with the installation of SmartSearch along with the Microsoft SQL 2005 Express database engine or can be run on your own full instance of MS SQL 2005.

SmartSearch is a storage independent solution. Records archived within SmartSearch can be saved to any server on the network including NAS, SAN or near line storage.

SmartSearch offers standard image processing features which include image enhancement, bar code and blank page separation as well as bar code recognition.

VERTICAL MARKET APPLICATIONS

- Accountants
- Automobile Dealers
- Construction Companies
- Financial Planners
- Healthcare Organizations
- Higher Education
- Import & Distribution Companies
- K-12 Education
- Manufacturers
- Medical Billing
- Mortgage & Title Agencies
- Non Profit Organizations
- State, Local & County Government

BUSINESS POINT APPLICATION

- Accounts Receivable
- Accounts Payable
- Asset Management
- Credit Files
- Compliance
- Customer Service
- Disaster Recovery
- Human Resources
- Inventory Control
- Operations
- Patient Billing
- Project Management
- Sales Order Entry
